

Job Title:	ITSO Project Manager (IT Specialist 6)
Opening Date:	08/14/2017
Closing Date:	Continuous
Salary:	\$71,040.00 - \$93,156.00 Annually
Job Type:	Full Time - Permanent
Location:	Lacey , Washington
Department:	Dept. of Ecology

ITSO Project Manager

Join an organization that is an early adopter of new technologies and use your skills to help protect, preserve, and enhance Washington's environment. To learn more about our agency, visit our [website](http://www.ecy.wa.gov) at <http://www.ecy.wa.gov>

This position is a member of Ecology's central IT Project Management section. You'll be working on projects that interface with the public to support our environmental programs (for example Water Quality, Air Quality, etc.) and also on projects that provide services to our staff.

In this position you'll implement new content management systems, environmental systems and financial systems. You'll analyze system requirements, perform build/buy analyses, and work with contractors to implement your projects.

Here's what we're looking for

Candidate should have a bachelor's degree in computer science or related field, and five years of IT project management experience on large scale projects. Preferred candidates have the following:

- Completion of a PMI project management certification.
- Knowledge of enterprise content management processes and automation efforts.
- Familiarity with IT industry standards bodies, processes, and existing standards.
